Complaint: We received a shipment of Amoxicillin 500mg capsules (batch B2401A) and noticed that approximately 15 capsules in three separate blister packs show visible discoloration - a yellowish-brown tint compared to the normal off-white capsules. No unusual odor was noted. Product has been stored per label conditions at our pharmacy warehouse. We have quarantined the affected packs and are requesting an investigation and replacement. Please advise on further steps and whether this batch has had similar reports from other customers.
